How does it work?

JSCR

A **JavaScript** CodeRetreat is a **FREE** day-long practice event, focusing on the fundamentals of software development and design.

- TDD
- Clean code
- JavaScript
- Refactoring
- Better coding
- Fun :)

Where and when?

JSCodeRetreat

It was first kicked off in **Munich**, but the event takes always place in various cities, simultaneously.

JS CodeRetreat Vilnius, March 2014

The JS CodeRetreat regularly takes place **every 3 months**

Next dates:

- ▶ September 6, Munich, Global date
- ▶ September 12, pre-JSConf EU, Berlin

- Maintain a high quality level event
- Constantly bring exceptional facilitators on stage
- Sharpen the developers' skills
- Educate about better coding
- Keep this event clearly distinct from a conference:
act a lot, listen very little

Sponsoring: a no-package format

This free day-long event needs sponsors for **food** (breakfast, snacks, lunch), **drinks** and **location**

Reach and interact with highly skilled web developers from the top european tech hub, Munich

Smart way of reaching the IT community for a reasonable price

Freely decide if you'd like to sponsor just the **Munich** event (local partner), our one-time **Berlin** event or all locations involved (global partners)

Berlin: don't miss the opportunity!

JS^{CR}

As an additional one-time event, we're proud to announce that we're organising a JS CodeRetreat in Berlin on the **12th of Sept 2014**, just before the massive JSConf EU

We're still looking for sponsors for food and drinks!

This is a perfect opportunity to be associated with the JS community: advanced web developers will be joining from all over the world
